We Believe the Mother Cow Matters

www.WhistlingWindsAngus.com

We want to welcome you to our 16th annual sale. Thank you to all of our past buyers who transitioned graciously with moving our sale to home. We are very humbled and grateful for all of your support over the years. If you are newly examining our program, I invite you to visit and tour our cow herd. Over 20 years in the making, we are very proud of each individual cow that has contributed to our herd success. Through those years, we held true to our core beliefs in this business; at the top of that list is balance. We believe you can't chase extremes, and it all comes down to the mother cow. For our environment we are looking for a middle

of the road framed cow with good feet, utter, disposition, and fertility. The mother cow must achieve all of this while maximizing weaning weight according to her body size.

Wow, Montana is always an interesting place when it comes to weather. It has been challenging to say the least. Our weaning weights are down a bit, but I have to say the cows did a pretty good job considering the summer we had. We never creep feed. We are praying for some early spring rains to ease the burden on over using our pastures this coming summer. Mother Nature does her own culling on years like this one. There has been no end to our thoughts and prayers for all ranchers alike who have downsized or dispersed because of the drought. It takes a lifetime to develop a cow herd the way you want.

Early last spring we received an opportunity to purchase the remaining Top Notch Angus cows. For those of you who don't know, we sold with Top Notch Angus for 15 years in Montana's Northern Premier Sale. It's not too often you get an opportunity to purchase the heart of someone's herd. There are some cows in this bunch that will have a truly lasting impact on our program.

When we select an AI sire, a key focus is emphasis on the daughters. In a world run by numbers, we try to balance the EPDs with what will work in our environment. Keeping that emphasis on the daughters, this year we added 2 proven sires, Rainmaker 4404 and Paintrock Trapper. Both bulls are proven cow makers each with a balanced EPD profile. We also added two young sires, Musgrave Crackerjack and Mohnen Homeraised. Both bulls come from reputable programs that pay attention to maternal qualities. Crackerjack is a heifer bull that sires moderate framed structurally correct cattle. I really like the overall look of this sire group. You will see plenty more in the future. Homeraised is another highly maternal calving ease bull that looks to have great overall foot structure. The daughters from Homeraised could be his best legacy. We also are using a couple bulls we raised. WW Hi Line is a Rainfall son that we sold to Zach and Cassi Lewis in our 2020 sale. WW Chaps is a bull we sold to GDAR in our 2019 sale. The daughters out of Chaps look to be moderate framed with good udders.

Our bulls are fed a high roughage ration to achieve a 3 lb per day gain to ensure soundness. This year we moved our breeding soundness exam closer to the sale date. Scrotal and breeding information will be on a supplement sheet available sale day and also posted to our website.

We want to thank all of the individuals that help put our year of madness together. Thanks to Dustin Qunell for the daily grind that has turned into many years of hard work. Thanks to Austin Buzanowski, Trey Dempewolf, and Jazlyn Schmidt for the great job trimming. Thanks to Annie Branger and Richelle Barrett for a great job taking pictures. Thanks for Rod and Cooper Spicher for preparing the brisket for lunch. Thanks to Dr. Casey Solomon and Meghan Holt for all the assistance from vet work to day help. Thanks to Will Rambo and Josh Stroh for keeping us in feed and consulting on the rations.

David and Katie Sattoriva

Whistling Winds Angus

Sight Unseen Purchase Guarantee - Buyers unable to attend the sale may call any time. Let us know your bull needs and your budget range. We'll bid on and purchase the best cattle possible for your specifications. We'll let you know of cattle purchased following the sale and make payment arrangements with you. If you aren't satisfied upon delivery, you don't own the bull(s).

Health & Performance - All bulls sell with complete breeding soundness exam, including scrotal measurements, palpation and semen evaluation by Dr. Casey Solomon, Milk River Reproduction. All bulls have been tested negative for BVD. They have received Fusogard, BoviShield Gold FP5 VL5 and pour on. The herd is part of an on-going Johne's screening program, and all bulls come from Johne's negative dams. See page 23 for more information.

Bull Development - The bulls were developed on a high roughage ration at a 3 pound ADG to insure soundness.

Genomic Enhanced EPDs - All of the bulls in the sale offering have had HD50K DNA testing to increase EPD accuracies and predictability. The test is a tool to enhance selection and predict genetic potential. EPDs are current as of 2/21/22. Updated EPDs at www.Angus.org

Retained Interest - Whistling Winds Angus is retaining a 1/3 revenue share interest on all bulls selling in the sale, unless otherwise announced from the block. Natural use and salvage belongs to the buyer. If we choose to collect semen from a bull that you have purchased, we will have it done at your convenience and at our expense.

First Year Breeding Guarantee - (breeding season is defined as the 90 day period following the first turnout of the bulls). Please notify the breeder should an injury occur and prior to the injured bull being sold for salvage. All injured bulls must be diagnosed by a veterinarian. All bulls will be given 50% of the value of the injured bull, minus any salvage value, toward a credit or replacement bull if one is available.

Terms & Conditions - All cattle sell according to the standard terms and conditions of the American Angus Association.

Delivery/Hauling Rebate - Free delivery on the bulls within Montana. If you bring your trailer to the sale, a \$40 rebate will be returned to you after sale settlement for bulls you haul home on sale day.

Liability - All persons attending this sale do so at their own risk, legal or otherwise for their safety or the behavior of the animals. The owners, auction service and sale staff assume no liability for property loss or any accidents that may occur.

Announcements - Announcements from the block will take precedence over the catalog.

Accommodations -

He is an extremely balanced bull that ranks in the top for CED, BW, WW, YW, MARB and REA. Moderate framed and deep bodied with exceptional rib shape, sufficient muscle and is very correct in his structure, free moving and athletic. An outcross pedigree coupled with calving ease creating mating flexibility in any program.

If there's a model bull to use on heifers for the rancher who wants it all, Homeraised is it. With a balanced EPD profile, his strengths lie in calving ease and cow making. He has great feet, with a balanced top down to a wide base. Homeraised has a herd bull presence with a softer calving ease, cow maker appearance.

A calving ease bull that is phenotypically phenomenal. Heavy muscled, bold ribbed and super sound footed. He couples extreme calving ease with performance and power. He brings more maternal predictability to the table than most. A bull to inject muscle, substance and shape with balanced EPDs and the look you like.

American Angus Association Selection Tools

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Cow Energy Value (\$EN), expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$Value indexes, are multi-trait selection indexes to assist beef producers by adding simplicity to genetic selection decisions. \$Values are reported in dollars per head, where a higher value is more favorable. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

Maternal Weaned Calf Value (\$M), an index expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. \$M is built off of a self-replacing herd model where commercial cattlemen replace 25% of their breeding females in the first generation and 20% in subsequent generations. Remaining cull females and all male progeny are sold as feeder calves. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

Weaned Calf Value (\$W), an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

Beef Value (\$B), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

He is a thick made and moderate framed, good footed, and deep-bodied bull. Has a very balanced EPD profile. Ranks top 10% for \$M, 15% \$W, 20% HP, 25% for both WW and YW. His dam comes from a very solid cow family for us. She is very moderate framed, good udder, with excellent feet. She calved AI again this year.

Dam of Lot 2 just after she calved this year. She is the kind of cow we strive to produce.

 Losing is 🐄🐄

Johne's Control Program

This disease is not new, but is becoming ever more present since I graduated in 2012. Animals infected by the slow growing Johne's bacteria (*M. avium* subsp. *Paratuberculosis* - MAP), intermittently shed the bacterium in their stool and colostrum or milk. Infected animals become clinically ill in their maturity. The Montana Department of Livestock has developed a certification program for producers who are actively screening their entire herd for the disease, Whistling Winds Angus is enrolled in this program.

The bottom line is, this disease is a "corker" for many reasons.

- We cannot accurately determine if calves less than a year are infected.
- To accurately test a herd, all animals over a year of age have to be tested.
- The slow growing and intermittent shedding nature of the bacterium makes accurate testing more challenging.

The State Certification Program has established guidelines to cut through the confusion and give producers options to manage or eradicate the disease within their herds. I am an accredited Veterinarian and have participated in the Johne's training provided by the state. Whistling Winds Angus has worked with me to certify a herd plan for management, biosecurity, and testing that has been approved by the Montana Department of Livestock. Whistling Winds Angus tests all cattle over a year of age, annually, and they have a zero tolerance policy for Johne's disease in their herd.

Thank You

Hubbard Feeds
for sponsoring the Water Hole!

Thank you Will Rambo and Josh Stroh.

A circular target graphic with a bull's head in the center, overlaid on a dark background of a herd of cattle.

ABOVE AVERAGE GOALS REQUIRE TARGETED BULLS

Aim High

The Targeting the Brand™ logo highlights registered Angus bulls with greater genetic potential to produce calves that meet the most challenging specifications of the *Certified Angus Beef*® brand.

Only 1 in 4 non-parent Angus bulls qualify.

Minimum Genetic Requirements

Marbling EPD (Marb)	+0.65
Dollar Grid Carcass Index (\$G)	+55.0

The Targeting the Brand logo, a circular seal with 'SINCE 1978' at the top, a silhouette of a cow in the center, and 'CERTIFIED ANGUS BEEF® BRAND' at the bottom. The words 'Targeting the Brand' are written around the perimeter of the seal.

For more information on Targeting the Brand™ visit CABcattle.com.

WHY WE TEST WITH HD50K™ FROM ZOETIS

Powered by HD50K™ from Zoetis, our cattle sell with genomic-enhanced expected progeny differences (GE-EPDs).

With GE-EPDs, we're confident that customers like you can minimize risk in their investment — and enhance the productivity of your cattle.

The benefits of buying HD50K-tested bulls and heifers goes beyond added accuracy for the complete range of traits for more productive daughters and progeny. You'll know early on what that animal is likely to transmit to its offspring and potential for performance in the feedlot and on the rail. You can also match the HD50K tested sires you buy from us to replacement heifers — through GeneMax® Advantage™ — to make better-informed breeding and management decisions down the road.

Knowing an animal's potential. Continuous progress of your herd. That's why we test with HD50K.

Sale Notes:

Thanks for Joining Us!

KOUPALS TRAILBOSS

Bull Born: 01/05/21 | Reg Number: 20158282 | Tattoo: 1048

During our visit to Koupals, Trailboss was the bull in the pen that kept you going back to him. He is extremely long, deep-bodied with added bone and muscle standing on very good feet. Once we got to see his dam and granddam, we knew that he is a bull that can have a positive impact in our herds.
